ANGLO-CAN. GOLD ESTATES

Mr. Sullivan Addresses the Shareholders at Annual Meeting in London.

An extraordinary general meeting of the shareholders of the Anglo-Canadian Gold Estates, Limited, was held on Tuesday, at Winchester House, Old Broad street, E.C., to hear a statement from Mr. Alan Sullivan, the company's manager, on the position and general prospects of the company's mines in Canada. Mr. S. W. Paddon, chairman of the company, presided.

The secretary, Mr. Dever-Summers, read the notice convening the meeting. The chairman briefly introduced Mr. Sullivan to the meeting, and requested him to address the shareholders.

Mr. Alan Sullivan, who was cordially received, in the course of his remarks, said: When your directors cabled me to come to England the receipt of the message gave me a great deal of pleasure, as I felt it was time that the shareholders had a statement straight from their manager, and had an opportunity of satisfying themselves, collectively and individually, as to the progress of their undertakings in Canada. Your Board have co-operated with me in the fullest and most thorough manner possible, and nothing which has been submitted for their decision has been left unweighed, while, at the same time, they have allowed me as much latitude and independence as any manager can conscientiously accept. I wish to lay stress on this fact, as it has greatly deepened my sense of responsibility toward the Board and shareholders, whom I like to think of as my friends, and it is a consideration which I think every manager is bound to remember when he is busily engaged managing other people's business. When we last parted, about two years ago, in this building, I felt encouraged in telling you that we had a good prospect with rich ore in the Reliance, which I believed would make a mine. This was also the opinion of others who saw the property. When I returned to Canada there was rich ore there, but prospecting, which was going on without interruption, resulted in the finding of the Elizabeth, in which every indication pointed to a larger body of ore than we had yet discovered, and which offered so many advantages over the Reliance that we decided to concentrate our energies on the former and cease operations for the time being on the latter. This has already been explained in my reports to the Board. The progress of work

thru on Lake Superior. Thanks to the enterprise of the builders of the Canadian Northern Railway it now takes seven hours and costs about \$6 a ton. I need not weary you with the difficulties and problems which every manager must face and solve, but would ask you to remember that it is one thing to be sent to a property to develop and equip it, but it is a vastly different thing for any individual to put himself up against a trackless and heavily-timbered wilderness and to find a mine before he does anything else. (Hear, hear.) I have been reading lately reports of various mining and exploring companies operating on the west coast of Africa, in which reference is made to the staff of engineers, explorers, surveyors, etc. Well, our area is greater than that of many West African companies. I believe it to be more valuable, yet your whole technical staff literally paddled his own canoe 2,500 miles in one season. (Hear, hear.)

But I am glad to say that the day has now come when the worst is over; the country is being rapidly opened up, and communication and transport are no longer the problems they were eighteen months ago. (Hear, hear.) From the reports which you have received you will see that in the Elizabeth on the 10th of May—not 17th as printed—we had in sight \$180,000 of ore. I am glad to say that in the lower or 230 foot level the lode maintains its full value, averages over 6 feet wide, and the last return was \$12. This estimate includes only the ore blocked out on the north side of the shaft. We have already driven south and got payable stone, but not in so large a body. We have driven south on the 10th a distance of 70 feet, and by driving another 125 feet and raising to the surface we should have an additional reserve of about \$100,000 if the indications already met with continue to be favorable. The total expenditure in Canada to date is about \$100,000, by the time we are crushing it will be \$150,000, and by that time I hope to have about \$300,000 in sight, which should realize net about \$150,000, or an amount equal to our total expenditure on all our properties. (Applause.) It was with this object in view that I advised your Board to leave the Reliance for the present. Drifting proceeds day and night all the year round at the Elizabeth; and the first thing in my programme now is to increase our air compressor plant by installing its other half and to sink the main shaft another 100 feet, and thus open the fourth level at 330 feet from the surface. You will observe that it is the intention of the Board to erect 20 stamps this year, with a view to increasing to 40, when more work has been done on several lodes which lie within a few hundred feet of the Elizabeth main shaft. If this increase is

ahead work lies before us, and our margin of profit should be \$10 a ton. I wish to strongly impress upon the fact that this property is potentially too profitable to be left unworked, and the longer this lode is left to itself the longer delayed is the time when you can confidently expect very large returns indeed. Some lodes seem to have about them almost a "personality," if one may so term it. I am greatly impressed with the "personality" of the Sturgeon lake lode. All conditions point to great depth and steady values. We have another property about four miles distant, which is on the southerly strike of a most massive and valuable ore body, certainly the most valuable potentially in the district. Judging from published assays. Large samples taken in bulk averaged about 1 oz. This lode, of which I hope to locate the extension with the diamond drill on our property, varies from 20 feet to 70 feet in width, and has been proven to a depth, so far, I believe, of 100 feet, with satisfactory returns. Our property lies about one-third of a mile from the nearest workings, and has a large quartz outcrop about 12 feet wide visible for 1,000 feet. We have not had time nor opportunity to test it as yet.

Over and above these holdings we have large areas of about 45 or 70 square miles unprospected, which may have very good things in store for us indeed. You need have no fear that anything will be left undone to secure the best outcrops we can find here. I trust that what has been said will satisfy you that up to the present your money in Canada has been judiciously spent. (Hear, hear.) A manager operating at a distance of 1,000 miles from his Board of Directors is called upon to decide many things of importance to his work without the possibility of consultation with that Board. He is not justified in avoiding risks to too great an extent, for without incurring risk at the outset he can accomplish nothing. Believe me that hard work is worth nothing without discrimination, and I hope you will consider that the operations of the Anglo-Canadian have been conducted with that discrimination which must precede their successful issue. (Applause.)

Having informed you of the progress of your work up to date, I wish to conclude by coming to the second object of my visit to England, and that is the issue of our reserve capital of £17,000. The position is this—we have ready to mine and crush so much raw material, and we want a factory to convert it into the finished product and realize our profit. Furthermore, we wish to develop another deposit of raw material which will realize still greater profit. To do this will require the unissued capital. Anticipating the very natural wish on your part for some expression of confidence in the

the shareholders would avail themselves of the opportunity now offered to take up the unissued shares. He was quite sure that in so doing they would act very wisely and in their own interests. (Applause.)

Mr. W. Leigh-Hunt, in seconding the motion, expressed the opinion that Mr. Sullivan had earned their warm recognition, not only for the industrious way in which he had worked, but for the economical manner in which he had carried out the operations on the property. He had obtained a great deal with a comparatively small amount of capital. (Hear, hear.) He wished to know what steps the Board proposed taking if the whole of the £17,000 required was not subscribed.

The Chairman, in reply, said that if they did not get the whole of the £17,000 subscribed they would only be able to put up complete machinery for the Elizabeth mine and to develop it until they were ready to crush. However, if they obtained £17,000 they would have enough to go on working the Lake Sturgeon property. If they did not get the £17,000—but he thought there was no question of that—then they would simply leave the Lake Sturgeon in abeyance for the present, and Mr. Sullivan would devote his energies to the Elizabeth mine.

Mr. Sullivan remarked that if on the present issue they could not get enough money to develop the Lake Sturgeon property, they would, in the future, have to develop it out of the profits of the Elizabeth mine. That, in his opinion, would be bad policy, and he would make a proposition to the shareholders: they wanted £17,000; well, half of £17,000 was £8,500. He had already secured the subscription of £7,000, and he would find the balance of £1,500 to make half of the £17,000 required, if the shareholders would subscribe the other £8,500. (Applause.) In reply to a shareholder, he stated that £12,000 was required to work the Elizabeth mine alone.

Mr. Leigh-Hunt said that Mr. Sullivan's offer was not only a fair, but a very businesslike proposition, and he hoped that the shareholders would fall in with it and subscribe their half of the money required. (Applause.)

The Chairman, in reply to a shareholder, said during the past year they had lost a director—Mr. Penning—by death. Mr. Price had accepted the vacant seat on the Board, and acquired his interest in the company after hearing Mr. Sullivan's views regarding the prospects of the undertaking.

The motion was carried unanimously. Mr. Sullivan: I thank you very much indeed, I stand or fall with the Anglo-Canadian Company, and I am perfectly willing to do it. If there are any gentlemen here who would like a little more light thrown upon the position and prospects of the property, I shall be glad to see them after the meeting is over, or at the offices of the

every manager is bound to remember the time we are crushing it will be \$150,000, and by that time I hope to have about \$300,000 in sight, which should realize net about \$150,000, or an amount equal to our total expenditure on all our properties. (Applause.) It was with this object in view that I advised your Board to leave the Reliance for the present. Drifting proceeds day and night all the year round at the Elizabeth; and the first thing in my programme now is to increase our air compressor plant by installing its other half and to sink the main shaft another 100 feet, and thus open the fourth level at 330 feet from the surface. You will observe that it is the intention of the Board to erect 20 stamps this year, with a view to increasing to 40, when more work has been done on several lodes which lie within a few hundred feet of the Elizabeth main shaft. If this increase is justified we shall be also justified in developing a very good water power, which lies within two miles of the mine, thus reducing the cost of crushing to an absolute minimum. We have on the ground enough timber and lumber for our mill. Ground has been broken for foundations, and, thanks to the railway, the transportation of heavy machinery no longer causes us anxiety. It was said to me by a leading gentleman in Rhodesian circles that were the Elizabeth in a more fashionable and better known district, Anglo-Canadian shares would be today at a very considerable premium. (Hear, hear.) Well, it lies with us to make the district fashionable, and with your assistance it can be done, and will be done. (Applause.)

Work so far on the Elizabeth enables me to report that this property should return very substantial dividends on our total capital with a 20 stamp mill. But this is not enough. Your prospectors discovered last year a very fine outcrop of good quartz in Sturgeon lake district, lying north of the Canadian Pacific Railway about 90 miles. This property we hold by lease—convertible at any time into title in fee simple. For details of this work I refer you to the report you have received. The development of this lode will not be accompanied by the distracting geological conditions, due to a fault, which made the Elizabeth at one time a sort of a Chinese puzzle. We have exposed so far an unbroken one chute of 50 feet in length, averaging \$15, and over 3 feet in width. Gold is visible in many places, protruding from the outcrop. Plain, straight

Drifting proceeds day and night all the year round at the Elizabeth; and the first thing in my programme now is to increase our air compressor plant by installing its other half and to sink the main shaft another 100 feet, and thus open the fourth level at 330 feet from the surface. You will observe that it is the intention of the Board to erect 20 stamps this year, with a view to increasing to 40, when more work has been done on several lodes which lie within a few hundred feet of the Elizabeth main shaft. If this increase is justified we shall be also justified in developing a very good water power, which lies within two miles of the mine, thus reducing the cost of crushing to an absolute minimum. We have on the ground enough timber and lumber for our mill. Ground has been broken for foundations, and, thanks to the railway, the transportation of heavy machinery no longer causes us anxiety. It was said to me by a leading gentleman in Rhodesian circles that were the Elizabeth in a more fashionable and better known district, Anglo-Canadian shares would be today at a very considerable premium. (Hear, hear.) Well, it lies with us to make the district fashionable, and with your assistance it can be done, and will be done. (Applause.)

Work so far on the Elizabeth enables me to report that this property should return very substantial dividends on our total capital with a 20 stamp mill. But this is not enough. Your prospectors discovered last year a very fine outcrop of good quartz in Sturgeon lake district, lying north of the Canadian Pacific Railway about 90 miles. This property we hold by lease—convertible at any time into title in fee simple. For details of this work I refer you to the report you have received. The development of this lode will not be accompanied by the distracting geological conditions, due to a fault, which made the Elizabeth at one time a sort of a Chinese puzzle. We have exposed so far an unbroken one chute of 50 feet in length, averaging \$15, and over 3 feet in width. Gold is visible in many places, protruding from the outcrop. Plain, straight

at all our properties. (Applause.) It was with this object in view that I advised your Board to leave the Reliance for the present. Drifting proceeds day and night all the year round at the Elizabeth; and the first thing in my programme now is to increase our air compressor plant by installing its other half and to sink the main shaft another 100 feet, and thus open the fourth level at 330 feet from the surface. You will observe that it is the intention of the Board to erect 20 stamps this year, with a view to increasing to 40, when more work has been done on several lodes which lie within a few hundred feet of the Elizabeth main shaft. If this increase is justified we shall be also justified in developing a very good water power, which lies within two miles of the mine, thus reducing the cost of crushing to an absolute minimum. We have on the ground enough timber and lumber for our mill. Ground has been broken for foundations, and, thanks to the railway, the transportation of heavy machinery no longer causes us anxiety. RAT PORTAGE, ONT., JUNE 13, 1902

OUR SUMMER VISITOR.

Numerous enquiries have been received at the Miner office during the past few days about vacant houses in town and on the lake. Some of them it is true, are for permanent residences by people who wish to locate here, but the majority of the enquiries are for suitable summer residences. The Miner Publishing Company, in order to encourage the suggested influx, is prepared to let a little Board of Trade work on its own account, and here-with announce, that a list of vacant houses of summer residences which can be rented will be kept in the office, and held for reference, for the guidance of strangers on a house seeking mission. As every individual visitor who comes here for the summer, and every new family located permanently, increases the volume of trade, and adds to our commercial prosperity we think that the desirable end justifies the means we are adopting, and that "means" is, that we will compile the above mentioned list free of charge and if necessary advertise the particulars of each house for rent, entirely at our own expense in the Miner. Property owners who have vacant houses or furnished residences which they desire to rent may notify us, giving particulars, amount of rent, etc., and we will do the rest.

This offer does not apply to offices or business places.

CHIEF TELEPHONE RATES.

Vienna calls have solved the problem of long distance telephones. This is due to government ownership. There are now over 2500 telephones in use in that city. The rates are much cheaper than in the United States. For an annual payment of \$50 subscribers are not only connected with this immense local system, but also with Berlin (50 miles), Lemberg (50 miles), Dresden (100 miles) and over 20 other towns in Austria-Hungary. Each of the 2500 places, many of them small towns with a few thousand inhabitants, has an excellent local municipal telephone service. A scheme is now being considered by the ministry of commerce of Austria by which every house in Vienna can be supplied with a telephone. Vienna, like New York, is built on the flat system, and there are not less than twenty families living in one house. It is proposed to establish a small telephone "central" in each house, by means of which the family telephones in the various flats or apartments can be connected with one central number.

murderer. The Boers fought for their country, the rebels fought for their nationality, and Great Britain recognized the belligerency of the Dutch patriots. But Colonel Lynch's country was not at war with nor in rebellion against England, and he had no shadow of right to point a rifle at any man. His crime is therefore blacker than murder—it is fratricide.

"No. 1 sawmill started running last Monday," says a local sheet. We might also add that No. 1 started running the Monday before last Monday, and indeed several Mondays before that, so that the fact of its starting up last Monday does not strike it as being in any way remarkable.

Krenger, Wessells, Sten, Bourke Cockran, Anacanda Stand and some others who did no fighting. We will fight to the bitter end and will never recognize King Edward VII. God is on our side and we are sure to win. We will drive the British into the sea," etc.

Botha, De la Rey, De Wet, Steyn and others who did the fighting. We have fought long and hard and being fairly beaten we desire to desist from further resistance, and we acknowledge King Edward VII as our lawful sovereign.

"Nuff said!"

We don't mind the News copying our items, but we must again call their attention to the fact that we cannot hold ourselves responsible for said items if our editors will insist upon butchering, and dressing, and skewering them up to look like something we never intended them to be. Our printers it is true, made a mess of the spelling of Mr. Pfeffer's name, but they did not set it up "Pfeffer." Neither did the reporter say that the gentleman in question had been "mangled" at the Black Eagle for some years, because he knew that Mr. Pfeffer had only been there five months. And finally, the amalgamation did not "leave this week" as alleged by the News, not last week, nor even the week before that, but just five weeks ago!

YOUNG DYMENT STUCK ON.

Barrie Hoy Held His Own With "Buckling" Horse Before Gen. Litalton.

In a letter to Mr. James A. Macfarlane, of the New York Life, a week before the Carruthers-Bour battle, Mr. James Robert Hoy, a Toronto officer of the medical corps of the late contingent of Canadians, says: "We landed our snafu cases at the Cape and then went up the east coast to Durban. At this port we were landed and loaded into cars which have few of the comforts of our colonist sleepers. When I wanted to sleep I went into the forage car and made myself as cozy as possible on baled straw. The journey consumed two days and two nights, and would have been tiresome had it not been for the interesting points along the route. We passed through many of the places connected with Sir Redvers Buller's campaign—Estcourt,

WISE CANADIAN HORSES.

The Beginning of a Family New Breed—An Equine Blood—Why the Aylwin Mail Carrier Kept Dead.

To most people it would seem to be impossible that the horse, by nature a denizen of a warm or at least a temperate country, could thrive in a wild state amid the rigors of a Canadian climate. That this is possible is shown by an incident which occurred in Quebec Province during the past winter.

A brace of moose hunters, who were camping out in the woods near the end of December last, in the extreme north of Pontiac County, thought they saw a white moose feeding in the scrub near by. Some scientific and painful stalking was done and just as the rifles were being levelled at the game it saved its life, and startled the hunters by giving utterance to a decidedly equine neighing.

It was then joined by a second dark-colored horse from the shadow of the woods, and this one also proceeded to browse upon the twigs and branches. As soon as the men showed themselves, the pair dashed back into the woods and disappeared.

The next day they narrated their experience to a band of shanty men and found that three or four of them had also seen the pair of horses ranging wild in the woods. At times the pair were accompanied by a big red mare and a young foal.

The mare was recognized as one abandoned in the woods two years ago. The two horses are supposed to be the team of a lumberman who was drowned.

These animals have managed to subsist upon the beaver meadows in summer, and by browsing on twigs in winter for several years. Who knows but that there is a nucleus here for the raising of a drove of hardy though perhaps stunted wild horses such as are found on the Welsh mountains or in the cold and barren Spetland and Orkney Islands to the north of Scotland?

The wonderful sagacity of horses often avails to prevent accidents in those northern wilds in the early winter. For instance, the writer once started to drive down Bark Lake on new ice at night fall. After ten hours' travel the horse, a very speedy Norman thoroughbred, came to a dead stop, and refused to go forward.

The beast had by her past actions inspired such confidence in her intelligence that her driver, not daring to attempt a turn in the pitchy darkness for fear of losing his bearings, covered her with the light of his lantern and stamped about on the ice near her all through the longest night in his experience.

When morning came it revealed a almost frozen man and horse upon the ice and open water just thirty feet in front of them. At the same time was a man's tongue or a man's body yet frozen into ice, four or five yards away.

Experiment showed that six feet before the sleigh, the ice was for the night's frost only three inches thick. Had another step been taken, there would probably have been one more added to the list of fatalities of the pine region.

Turns Bad Blood into Rich Red Blood.

No other remedy possesses such perfect cleansing, healing and purifying properties.

Externally, heals Sores, Ulcers, Abscesses, and all Eruptions.

Internally, restores the Stomach, Liver, Bowels and Blood to healthy action. If your appetite is poor, your energy gone, your ambition lost, B.B.B. will restore you to the full enjoyment of happy vigorous life.

Dreadful Kidney Pains. Could Not Rest or Sleep.

A. C. P. R. Conductor's Sufferings—He is Now Well and Gives Dr. Chase's Kidney-Liver Pills Credit for the Cure.

Mr. W. E. Berryman, Conductor on the C.P.R., St. Stephen, N.B., writes: "I have been railroadng for 23 years, and for ten years suffered from a severe case of Kidney Disease and Backache, a trouble common to railroad men. It troubled me all up to walk, and after walking up hill I would have to lie down to get relief, my back was so bad. I could not sleep more than half the night and then didn't seem to get any rest. I had used all sorts of medicines and was pretty badly discouraged when I heard of Dr. Chase's Kidney-Liver Pills. After using two boxes of this treatment I found it was helping me and five boxes have made a complete cure. I now rest and sleep well, my back is strong and the old trouble has entirely disappeared. Many people to whom I have recommended these pills have been cured. Anyone wishing further particulars write me."

The sale of Dr. Chase's Kidney-Liver Pills far exceeds that of any similar remedy. One trial is enough to convince anyone that this is the greatest family medicine that money will buy. One pill a dose, 25 cents a box, at all druggists or Edmondson, Bates & Co., Toronto.

It is proposed to establish a small telephone "central" in each house, by means of which the twenty telephones in the various flats or apartments can be connected with any required number. This house "central" will be under the charge of the janitor. The cost for each telephone will be only \$1.50 per annum.

A TEN THOUSAND CLUB.
The business men of Duluth have organized an association called "The Hundred Thousand Club," the object being to consider and advance numerous projects for the advancement of the commercial interests of the place, and to work untiringly until the city has a population of 100,000 people. Rat Portage might do worse than imitate this move of Duluth and form a Ten Thousand Club. Its name might make it more aggressive than our present Board of Trade. That there is work for such an organization few will question.

EDITORIAL NOTE.
The News figures that eighteen days are one-third of a month, and that three times two thousand are fifteen thousand. Seeing that these figures are given in connection with one of our mines, such statements should be calculated to help the district into an obscurity never with that enjoyed by the sheet that so fearlessly makes them.

The heavy rains of this month are beginning to create some little anxiety regarding the Manitoba wheat crop. The sprout opened up this year with a bright, open-ended prospect for Rat Portage, and it is sincerely to be hoped that a good crop will be harvested in Manitoba this fall. If this does not fall a busy time is coming for this town. We are almost entirely dependent upon Manitoba and the territories for a market for our lumber, which is being manufactured in such vast quantities this season, and which has already given such an appreciable impetus to local commerce.

Colonel H. H. H. the fishman who fought against England, not so much that he loved this country, but that he hated England could offer no excuse for his conduct when he was charged with high treason on Wednesday last. The man who deliberately shoots his fellowman through hatred or malice, is neither a soldier nor a patriot, but a

YOUNG DYMENT STUCK ON.
Barrie Hay Held His Own With "Buck." Horse Before Gen. Lytle's.

In a letter to Mr. James A. Macfadden, of the New York Life, a week before the Carruthers-Doer battle, Dr. James A. Macfadden, of Toronto, the medical corps of the last contingent of Canadians, says:

"We landed our smallpox cases at the Cape and then went up the east coast to Durban. At this port we were landed and loaded into cars which have few of the comforts of our colonial sleepers. When I wanted to sleep I went into the forage car and made myself as cozy as possible on baled straw. The journey consumed two days and two nights, and would have been a nightmare had it not been for the interesting points along the route. We passed through many of the places connected with Sir Redvers Buller's campaign—Estcourt, Pieter, Colenso, Ladysmith, Elands-lange, Glencoe, Dundee, Talana Hill and others. We were detained at Newcastle and put into an isolation camp, along with A. D. and C. squad of the C. M. H. During our period of quarantine we had two night alarms, but nothing serious developed. Most of the shooting was due to nervousness on the part of the soldiers. Just now we are under orders to move at 6 a.m. tomorrow, and our destination is not definitely known, but we fancy it is somewhere in the region of Standerton in the Transvaal. Some of the Ontario men for the first time yesterday. Elmsley, Charters, etc. They have been in a separate camp under Major Norritt during our isolation, and the regiment was united only yesterday. Lord Kitchener visited us a week or so ago, and spoke very kindly to our officers, and he thought it would be wise to leave the Canadians together, so I fancy we will be attached to a column consisting of C. M. H. and some other regiment. Gen. Lytle's came into camp on Wednesday to inspect and also to see a western chap ride a bucking horse. The Ontario chaps got to be cautious, the young Dymont of Barrie up, and I am pleased to say the boy stuck on and more than held his own. It was a novel sight to the general, and he was more than pleased. A few days ago we had a medical tournament on our camp. The medals were officers of the R. A. M. C. They were just like our turned loose in a candy store. Everything was novel to the free ambulances to our camp. They thought we had a lot of surgical goods."

Dr. Oiler's Little Joke.
From The Philadelphia Record:
At the meeting of the County Medical Society stories were told, and among them the following by Dr. Bryson: "When I was a student at the university," he said, "Dr. Oiler one day called a lot of us to the clinic room and asked us to examine and diagnose the case of a patient. The man was stripped to the waist and his body was completely covered with red blotches. Every student was admitted singly and required to write his diagnosis in a room by himself. The diagnoses, when they appeared, embraced everything from scarlet fever to carbon-spinal meningitis. Mine was 'I give it up.' When Dr. Oiler's comments came out in the monthly paper we found it was only a bad case of 'red flannel,' and the laugh was on us."

Two Points of View.
He—Your acceptance flatters me; I am sure I have nothing to make a girl love me. She—True; but you have enough to make a girl marry you.—Illustrated Bits.

Malt Breakfast Food produces physical energy and clearness of brain. It is the town's friend and health-giver. All grocers.

When morning came, it revealed an almost frozen man and horse upon the ice and open water just thirty feet in front of them. At the mare's feet was a man's tongue or cap and the man's body was frozen into the ice, four or five yards away. Experiment showed that six feet before the sleigh, the ice was after the night's frost only three inches thick. Had another step been taken, there would probably have been one more added to the unwritten fatalities of the pine region. The mail carrier on the Gatineau road in the anti-railway days once had a notable experience with a horse. He rode up one very dark night in the late autumn to the Aylwin post-office and stalked into the little store with his horse, where he was greeted with the almost astonishment by the crowd around the stove. "How did you get here?" they asked. "How did you cross the big Hamilton creek?" "What do you mean? How do I always cross it?" "Why, man," cried the crowd, "the bridge went out just at sundown. There is no crossing there." The driver laughed incredulously and said he had ridden up the road in the usual manner. To settle the matter the men took their lanterns and walked down to the side of the bridge. Since enough the bridge had been washed away, leaving only some of the crib work and the middle logs or stringers upon which the centre of the bridge, covering used to lie. These were about 18 inches wide, extending right across the 150-foot gully and were swaying with the current on their unequal foundation. And on these logs laid singly and end to end were the marks of the mail man's horse's shoes. Over 20 feet of raging water in the night of February darkness, the horse had unflinchingly traversed that narrow pathway. So unhesitating had his movements been that the man on his back was all unconscious of his danger, and unaware of the fact that the bridge had been carried away and that his beast was doing the Biondi act upon a swinging stone. There was not a man in the crowd of observers who had ventured to make the same journey that day in broad daylight. The mail carrier threw out his hat the next trip.

Mr. Oiler's Little Joke.
From The Philadelphia Record:
At the meeting of the County Medical Society stories were told, and among them the following by Dr. Bryson: "When I was a student at the university," he said, "Dr. Oiler one day called a lot of us to the clinic room and asked us to examine and diagnose the case of a patient. The man was stripped to the waist and his body was completely covered with red blotches. Every student was admitted singly and required to write his diagnosis in a room by himself. The diagnoses, when they appeared, embraced everything from scarlet fever to carbon-spinal meningitis. Mine was 'I give it up.' When Dr. Oiler's comments came out in the monthly paper we found it was only a bad case of 'red flannel,' and the laugh was on us."

A Battle With a Lynx.
Mr. Joe Lisk of Wilberforce, Ont., had an encounter with a lynx which he had caught in a trap in the bush one day recently. The animal had broken the chain of the trap and had climbed a tree when Mr. Lisk discovered it. He commenced to fell the tree and had about succeeded when the animal jumped down, landing square on Mr. Lisk's back. Then the fight began, the wildcat showed fight, and Mr. Lisk did not come through the contest unscathed. After considerable trouble he managed to shake off the animal, but not before his clothing was badly torn and a number of ugly scratches inflicted. With kicks and the aid of a club the lynx was finally killed.

established well-equipped massage
rooms close to Bond street, in the
fashionable part of London, Eng-
land.

Mrs. Fitz-George's charming suite
of rooms lead one out of another.
They are equipped with chintz cov-
ered furniture like a fashionable
boudoir, and have walls of chintz
paper hung with old engravings. The
patient is seated before a dressing
table, exquisitely appointed, with a
battery upon it, lotions and creams
in crystal bottles, and her attendant
forthwith studies her needs. Per-
haps a dense fog has imprinted its
dusky fingers upon the skin, atten-
tions which ordinary ablutions
have been powerless to obliterate.

In such a case and for other
purposes steaming is given. The
dress and hair are preserved by the
application of a snowy snoop, and
the steaming apparatus is charged
with a stimulating and cleansing un-
guent, is directed against the fact for
a short time. Then the attendant
loves the face with lotion, massage
cream into it, so that a crow's
feet and wrinkles, hollows and other
objectionable finger marks of time
disappear, bathes it afresh, coax-
ing into it, in lieu of a careworn
expression, the happier one that
speaks of health, and finally touch-
es the eyebrows and lashes with a
little brush and bids the patient
rise, rejuvenated in appearance and
enlivened in feelings. Some
specialists believe thoroughly in elec-
tricity, but Mrs. Fitz-George does
not employ it.

London is not to be the only Eu-
ropean capital to share with Paris
the distinction of possessing an in-
stitute of beauty. Soon there will
be one in St. Petersburg. Separate
treatment costs half a guinea, six
are given for £2 10s., while for a
course of twelve a still greater re-
duction is made, the charge being
£4 5s.

The Grass Lands of Great Britain.

Of the various crops known to
British agriculture the grass crop is
by far the most important, whether
it be regarded from the point of view
of its extent or from that of its value.
It is the main source of our home-grown
beef and mutton, and of the im-
mense native supplies of milk
and its products. According to the
latest official returns, those for
the year 1901 in Great Britain, pos-
sessed 16,827,249 acres of perma-
nent grass land, or grass not broken
up in rotation, and 4,856,387 acres
of clover, sainfoin, and grasses un-
der rotation, the total being 21,-
683,636 acres. As the total area
under grass and crops of all kinds
is returned at 32,417,445 acres, we
get, by deducting from this, the
21,683,636 acres of grass land, the
balance of 10,733,809 acres, the aggregate
area of all other crops, crops in ro-
tation, and bare fallow. In other
words, the average under grass is
double that that occupied by all other
agricultural crops together.

It should be understood that the acre-
age of grass here indicated does not
include mountain and heath land of
which there are some 13 million
acres used for grazing. About one-
half of the total grass area, and about
one-third of the permanent grass are
mown annually for hay, the remain-
der in each case being exclusively
grazed. Last year the mown area

ENGLISH MEN AND WOMEN.

The Girls Are Growing Stalwart While
the Men Are Deteriorating.

"Do you see that giantess?" said
a famous medical man recently, as
he called attention to an unusually
tall woman in Sloane street.

She was walking across the street,
with the stride of a 'Life Guards-
man.' Her head was erect, her
limbs gleamed with the evidences of
pure, fresh, buoyant health, and her
height was 6 feet at least.

"Now," said the physician, "look
at this one and that, and those two
and another just stopping to get in
that ridiculous little brougham. They
are all tall and athletic look-
ing and active. Look about you
among this throng of handsomely
dressed shoppers. Do you see any
midgets among them?"

There were, indeed, few short, un-
der-sized women. There was, how-
ever, a strange predominance of
tall, straight-stepping, broad-should-
ered ladies, and the great authori-
ty had first called attention to them
made a startling prophecy
regarding future femininity.

"Fifty years from now," he stat-
ed, "the women of the bested class-
es—that is, those women whose occu-
pations do not keep them constantly
within doors—will be six-footers.
You see the evidence before you. Year
after year women have been grow-
ing taller and stronger, save those
who work in offices and factories.
They are exempt from my prophe-
cy."

"What about them?" was asked.
"Ah, that is difficult to say," re-
plied the doctor, "but I do not
think I am far off in stating that
indoor women will become shorter
and less robust. I have given much
study to this subject during the past
ten years. I have made minute in-
vestigation and careful tabulation."

"I have seen the golf-playing,
hockey-driving, bicycle-riding, girl
sprout about an inch by inch every
year, and, on the other hand, I have
noted that the lack of air and exer-
cise have had a correspond-
ingly deteriorating effect upon those
poor things who are perforce ob-
liged to work indoors."

"Open windows would do much
for them. In fact, I think it would
be best if all employees were made
to provide fresh air, either by way
of windows or air tubes. Postivity
demands fresh air. Here in the
street is your proof, for all these
strong, tall Englishwomen are air-
grown."

"I have often noted," said the
prophetic medical expert, "that fore-
signers any the tall Englishwomen
are rapid, brainless, lifeless, all mus-
cle and no mind. Now, I am pre-
pared to disprove that. Where
in all the world are women more
intelligent? In Germany? Perhaps
in the lore of the cookery book.
In France? Yes, if you confine the
question to the art of the needle."

"No, the change may have been
direct twenty-five years ago when
the gaucy, ill-dressed, heavy-footed
English girl invaded the continent
with her walking stick and her
stock and her fur place her kang-
seesons long in contempt," but
now, since this blot on the nine-
teenth century's fair fame has gone
into the Ewigkett the tall little Eng-
lishwoman, who eats her meals ra-
tionally and as much as she likes
has gained not only in muscle and
bone, but in brain as well.

"And who about the man of fifty
years hence?" was asked.
"A great hulking hulk, a set of
useless legs, a pair of electric glow
lamps for eyes, and the whole hulk
dud up in a new-fangled 'tupeny

EDWARD II. CORONATION.

A Great Occasion Which Was Marred by
Many Blunders—Weak Fondness
of King for a Favorite.

Edward II. and his Queen Isabella
were crowned together at Westmin-
ster Abbey on Feb. 24, 1308. The
great occasion was marred by many
blunders, chief among them being
the weak fondness shown by the
young Queen to his favored fa-
vorite Piers Gaveston. He was put
forward as the principal personage—
the principal object of attention and
worship, to the great insult of the
barons and chief men of the realm.
Gaveston only must carry the
crown before the King and Queen.
Through this was an office to which
the great Earl of Lancaster or
Hereford might have laid more fit-
ting claim. The nobles were filled
with indignation, which Gaveston,
instead of endeavoring to disarm by
more modest conduct, appeared to
take a particular pleasure in ag-
gravating to the extreme. He ap-
peared in the greatest splendor of
armor, and his equipage and retin-
ence to those all seemed as if
every opportunity was sought rather
than merely employed, to exalt his
favorite, no matter at whatever
cost, whatever risk, or whatever
alienation of men's minds. The
selection of Woodcock, Bishop of
Winchester, to crown the King and
Queen was an evidence of the un-
worthy character of the monarch.

Worthy of having conspired
against his sovereign, Edward I.
Owing to the closeness of Gav-
eston's arrangements it was three
o'clock before the coronation of the
King and Queen was over, and the
short wintry days protracted the
banquet till dark. The lateness
excited the wrath of the hun-
gry nobles, and still more what fol-
lowed, for the food was badly cook-
ed and ill served, with a total want
of ceremony. The Queen experi-
enced many slights, but whether in-
tentioned on the part of Gaveston or
otherwise is not known. Isabella,
however, sent a letter to the King
of France, her father, complaining
of Gaveston. At this coronation,
so great was the pressure of the
crowd that Sir John Bakewell,
knight, was trodden to death.

In course of the ceremony the King
offered, first, a pound of gold, made
like a ring holding a ring in his
hand, and afterwards a mark, or
eight ounces of gold, formed into a
pilgrim putting forth his hand to
receive the ring—a conceit suggested
by the legend of Edward the Con-
fessor.

An Historical Reminiscence.

Green, after telling the unpopu-
larity of the Government on account
of the breaking up by the military
force of a reform meeting at Man-
chester in 1819 says, "The death
of George III., Jan. 29, 1820, and
the accession of his son, the
Prince Regent, as George IV., only
added to the general disturbance of
men's minds," says Lloyd's Weekly
Newspaper. "One result was a plot
by some desperate men to assassi-
nate the whole Ministry. The head
of this conspiracy was a discharged
soldier named Arthur Thistlewood,
who had been imprisoned for
twelve months for annoying
Lord Sulmuth. Along with a
band of a dozen or more desper-
adoes it had been arranged
that some of them should watch the
door of Lord Harcourt's house,
where the whole of the cabinet de-
livered a pretended despatch, the
rest were to rush in and kill all
the King's Ministers while they

Piecing.

That's a word
which may not be in
the dictionary in this
sense of its use, but
which is in very common use in some
sections of the country. She's always
piecing," they say of the woman who
runs to the cupboard at irregular hours
and eats a piece of pie, cake, or some
other dainty. This irregular eating is
one of the chief causes of dyspepsia
and "weak" stomach.

Diseases of the stomach and other
organs of digestion and nutrition are
completely cured by the use of Doctor
Pierce's Golden Medical Discovery. It
increases the supply of rich, pure blood,
and gives the body vitality and vigor.

"A year ago I was feeling very badly," writes
Mrs. Lizzie Abrams, of 125 Johnson Avenue,
Brooklyn, N.Y. "I had a very poor appetite and
when I sat down at the table I could not eat,
but would have to go away without even tasting
the food. Changing to a real and I can hardly
express the benefit received from it. The first
dose seemed to do me good. My appetite re-
turned and I was able to eat heartily. I have
improved so much since taking the 'Golden
Medical Discovery' I don't look like the same
person. Am today well and strong—the result
of taking six bottles of Dr. Pierce's Golden
Medical Discovery."

Dr. Pierce's Common Sense Medical
Adviser, paper covers is sent free on
receipt of 11 cent stamps to pay
expense of customs and mailing cost.

THE GLASGOW HOUSE

The month of
Roses is here

And we are ready with the daintiest range of WASH GOODS ever imported to Rat Portage. Fine Swiss Muslins and French Organ-dies in all the Latest Colors and Designs from 12¹/₂ to 90c per yd.

Chambreys

Will be Very Popular this season. We have them in Plain Colors and Fancy Stripes.

Anderson's Glasgow Gingham

Is known all over the world. We import them direct and can give you the Latest Styles and Best Values.

Prints

Our stock of English and American Prints is now at its best. You will find everything that is new in this lot.

300 Pieces Best English Print in light or dark colors. Latest Designs 14c per yard.
225 Pieces Extra Heavy English Print. Perfectly Fast Colors 12c per yard.
SPECIAL 25 Pieces Fast Color American Prints 5c per yard.

Galateas and Ducks.

If you are in doubt what to buy to make your boys' blouses just ask for our English Galateas in Stripes and Plain 15, 17¹/₂ 25c per yard.

SPECIAL BLOUSE SHOWING THIS WEEK...

Our New Season's Blouses are now open for your inspection and never before have we shown such a Magnificent Range. You want the Latest Styles. You get these at our store direct from the best Canadian and American manufacturers. New, Fresh, Up-to-Date Blouses, with a style about them which you cannot resist. White and Colored Muslin Blouses, tucked and embroidered, buttoned back or front. Linen Blouses, plain or embroidered. Chambray Blouses, in Grey, Blue or Pink, tucked or insertion trimmed.

Pick your Blouse now when stock is fully assorted.

Smallware Dept.

Here are some new arrivals that will interest you:

THE RUBENS

Mr. T. H. Day, of Chicago, paid Rat Portage a visit this week.

Mr. J. Walbridge, the well known business barrister, identified for some time with the city solicitor's office, left last week for Edmonton.

Mr. C. J. Gray and wife, of St. Paul, are registered at the Hilliard Opera House.

Mr. C. G. Groesbeck, the mining capitalist of Toledo, O., is in town on business connected with mining claims on the lake.

Mr. G. M. Riach is confined to his house at Tunnel Island owing to an accident which occurred about two weeks ago, when he fell on the steps coming up from Stone's boat house and sprained his leg. The wound healed up a few days after the accident, but ultimately inflammation set in. Mr. Riach is now making good progress towards recovery, however, and will soon be able to attend to his business again.

Mr. William Ross, M. P., of Port Perry, Ont., accompanied by his wife, and daughter, Miss Grace, arrived in

\$30.00 and send us \$1.00

Local Interest

The Club Regatta held last Tuesday night was well attended, the majority of the spectators however being ladies. But few of the races were very close except the semi finals and the finals. Hooper's crew carried off the trophy. All the boys showed good form however, and will give a good account of themselves if the Dominion Day regatta when the Winnipeg boys will be competing.

Dr. Hanson returned last night from Norway House, District of Keewatin, where he went to stamp out the small-pox plague among the Indians.

Mr. P. H. Austin, local representative of the Ontario Powder Company, left last night on a trip to Port Arthur.

Mr. Spencer Jones, manager of the Watkin Milk concert tour, passed through here last night on his way east.

The prospector named Joe Gotherly drowned in the Sturgeon Lake country is not the well known Lake of the woods prospector who is however just now in the new district, on a well organized expedition. The local man has two assistants with him, and is not connected with Steele or any other Port Arthur men. Also he spells his name Gotherly.

Miss N. Phillips sister of Mr. T. Phillips the hockey player and carman has been selected as a student at the University of Toronto. The Minister congratulates the young lady's parents Mr. and Mrs. Phillips.

Mr. Fife, one of Messrs Fife the Hardware merchants has passed here en route to a Toronto. Miss Fife was a student at a public school teacher here.

The Ontario Government has made a new batch of "King's" Quincunners but not one in a hundred is a figure in the King's River but rather figures in the King's.

Mr. James M. Savage ex-mayor of Portage passed through here on Wednesday night on his way to Port William.

Miss Anderson of Cushing, Que. arrived last week on a summer visit to her uncle, Mr. T. H. Davidson, of Normand.

Judge Chapple left Wednesday night on a trip to Wabigoon.

Mr. and Mrs. Geo. A. Moore, of London, Ont., are at the Opera House.

Mr. H. M. Farnham, of Minneapolis, was in town this week on mining business.

Dr. Joseph Fowler, of Buffalo, one of the directors of the Cameron Island Mining Co. arrived here this morning and took steamer to the mine. It is

the city solicitor's office, left last week for Edmonton.

Mr. C. J. Gray and wife of St. Paul, are registered at the Hilliard Opera House.

Mr. C. C. Groesbeck, the mining capitalist of Toledo, O., is in town on business connected with mining claims on the lake.

Mr. G. M. Riichi is confined to his house at Tunnel Hill and owing to an accident which occurred about two weeks ago, when he fell on the steps coming up from Stone's boat house and scoured his leg, he would be up a few days after the accident, but ultimately inflammation set in. Mr. Riichi is now making good progress towards recovery, however, and will soon be able to attend to his business again.

Mr. William Ross, M. P., of Port Perry, Ont., accompanied by his wife, and daughter, Miss Grace, arrived in town this morning and registered at the Opera House.

Mr. H. C. Baker and wife, of Toronto, are paying R. Portage a visit.

Crown Timber Agent, Margach paid a flying visit to Winnipeg on Wednesday, going up on the morning train and returning the same day.

Mr. Geo. S. Morris, C. P. R. train dispatcher will bring his wife and family here from Hamilton on July 1st.

HEALTH FOR LITTLE ONES.

Baby's Own Tablets Make Children Well and Keep Them Well.

If your children are subject to colic, indigestion or any stomach trouble; if they are troubled with constipation, diarrhoea, or any of the ills that afflict little ones, give them Baby's Own Tablets. This medicine will give relief right away, making sweet refreshing sleep possible. It will put children on the high road to health at once. It is doing this today for thousands of children in all parts of the country. Mrs. R. L. McParlane, Bristol, Que., says: "I take pleasure in testifying to the merits of Baby's Own Tablets. I have used them for my baby since she was three months old, and previous to using them she was a delicate child, she is now quite the reverse, as she is plump, healthy and strong. I think Baby's Own Tablets the best medicine in the world for little ones." These tablets are of the finest of all ages and dissolved in water or crushed in a powder, they can be given with absolute safety to the youngest weakest baby. Guaranteed to contain no opiate or other harmful drugs. Sold by all druggists at 25 cents a box, or sent post-paid by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont., or New York.

CORONATION DAY.

The day of King Edward's coronation will be celebrated here by a grand fête, under the auspices of the fire department. There will be competitions among members of the brigade in the various phases of their work, which ought to prove a very interesting exhibition, and as a programme of sports, in which all citizens may enter and compete. A prize list, which is growing bigger every day, and which has already reached a value of over

\$200, will be offered in an open field, and it is understood that there will be Indian pow wows, square races and other graceful novelties during the day's entertainment.

COL. LYNCH ARRESTED.

The Member Elected to Represent Galway is Charged With High Treason.

London, June 11.—Col. Arthur Lynch, who fought with the Boers in South Africa, and who in November last, was elected to represent Galway in the House of Commons, was arrested this morning on his arrival at New Haven, from Dieppe, France.

Col. Lynch, who was accompanied by his wife, was brought to London and was afterwards taken to the Bow Street police station.

Subsequently Col. Lynch was arraigned at the Bow street police court on the charge of high treason and was remanded until Saturday, June 14, after formal evidence of his arrest had been presented.

The prisoner, who was described on the charge sheet as a "journalist," sat in the dock apparently unconcerned until the magistrate asked him if he had anything to say in reply to the charge. The colonel, who is tall, erect and of military bearing, then arose, grasped the iron railing in front of the dock, hesitated and finally almost audibly replied: "No sir."

Col. Lynch, who did not reply to bail, and was taken to the cells. When he was searched nothing but a small sum of money was found on his person.

The Irish Nationalists, in the House of Commons, today heckled the ministers on the subject of the arrest of Col. Lynch. They wanted to know why the colonel had not the same right to surrender as other bachelors.

The government leader, A. J. Balfour, replied tersely: "He is not a bachelor."

John Redmond, the Irish leader, and J. G. Swift MacNeill (Nationalist), then turned to the secretary of state for home affairs, Mr. Ritchie, and asked him why he had not fulfilled his ministerial duty in informing the House of Col. Lynch's arrest on the charge of high treason.

Mr. Ritchie denied that it was his duty to so inform the House, but when the Irish members applied to the speaker, William Court Gully the latter upheld the Nationalist contention that the usual practice was to inform the House of Commons of such an incident through the speaker. Further questions were ruled out of order, and the subject was dropped.

Lieut. Col. John Philip Nolan, Nationalist, applied this afternoon for the release of Col. Lynch on bail; but the

magistrate said he had no power to grant the request.

WANTED: A General Servant. Apply to Mrs. Charlsworth, North Main street.

FOR SALE OR TO LET—5 roomed Cottage and a 7 roomed 2 story dwelling on Grace Street. Price that will meet competition. Apply to C. W. Chadwick.

WANTED: General Servant. Apply to Mrs. Charlsworth, North Main street.

BRIDGE IS ALL RIGHT.

A report was recently published in one of the Rainy River papers to the effect that news had been received that a tier of the Rainy Lake bridge—120 feet in length—had given away on Tuesday of last week. The mishap, the paper stated "will undoubtedly cause considerable delay in the moving of traffic east for some time." On inquiry at General Superintendent Hanna's office yesterday it was learned that the accident was not so serious as reported. It was not considered serious enough, in fact, to require the attention of the bridge inspector and did not interrupt traffic for three hours.—Winnipeg Free Press.

Paine's Celery Compound POSITIVELY AND PERMANENTLY CURES.

It Puts The System in Perfect Condition To Cope With All Hot Weather Dangers.

During the month of June people should closely attend to their condition of health. Small streams make mighty, rushing rivers; the little ills of life when neglected, frequently bring on maladies that end in death.

The so-called trifles of to-day—weak and deathly feelings, nervous twitches, debility, sleeplessness, and heavy dull pain in the head, and in a few days result in dread disease, paralysis, or the awful pangs of insanity.

This is the time when Paine's Celery Compound should be used by old and young who feel they are not up to the standard of full health, strength and activity. The hot overbearing weather of summer will soon overtake the weak languid, nervous and broken down. The results will be appalling and fatal to thousands if the system be not fortified by that best of medicines—Paine's Celery Compound. No other medicine in the world like it for making pure, rich blood, and for bestowing that robust health that can successfully cope with the dangers that have to be encountered in midsummer.

BORN.

At Norman, Saturday, June the 7th, to Mr. and Mrs. T. H. Davidson, a son.
